Overview:

Table :

All exercises			
Exercise	Levels	Concepts	Blocks Used
Fun with Basics	0/10	Sequence, Algorithmic Thinking	0
Loopy Loops	0/12	Loops, Debugging	0
Conditional Crops	0/12	Conditional Statements, Pattern Recognition	0
Backyard Functions	0/10	Functions, Variables, Events	0
Dog and the loops	0/8	Loops, Variables, Functions	0
Gardening Conditionals	0/6	Functions, Conditional Statements, Sequence, Algorithmic Thinking	0
Swamp conditionals	0/4	Conditional Statements, Loops, Variables, Sequence, Events, Functions, Decomposition, Algorithmic Thinking	0
Baloon pop functions	0/8	Conditional Statements, Loops, Variables, Sequence, Events, Functions, Decomposition, Algorithmic Thinking	0

Loops and castles	0/8	Loops, Variables, Functions	0
Desert conditionals	0/4	Conditional Statements, Loops, Variables, Sequence, Events, Functions, Decomposition, Algorithmic Thinking	0
Predator bird functions	0/7	Conditional Statements, Loops, Variables, Sequence, Events, Functions, Decomposition, Algorithmic Thinking	0
Functions on the field	0/9	Conditional Statements, Loops, Variables, Sequence, Events, Functions, Decomposition, Algorithmic Thinking	0
Fun with Basics	0/3	r	0
Loopy Loops	0/4	r	0
Conditional Crops	0/4	r	0
Backyard Functions	0/6	r	0
Fun with Basics - Grade 1 & 2	0/8	.	0
Loopy Loops - Grade 1/2	0/8	.	0

List of Concepts:

Decomposition

Breaking down a problem into smaller, more manageable parts.

Computational Thinking Concepts

Pattern Recognition

Identifying similarities or patterns within problems.

Computational Thinking Concepts

Abstraction

Simplifying complex problems by focusing on essential details and ignoring unnecessary information.

Computational Thinking Concepts

Algorithmic Thinking

Developing step-by-step instructions or rules to solve a problem.

Computational Thinking Concepts

Sequence

Understanding and writing instructions in a specific order.

[Programming Concepts](#)

Variables

Introducing the concept of containers for storing information.

[Programming Concepts](#)

Loops

Repeating a set of instructions multiple times.

[Programming Concepts](#)

Conditional Statements

Making decisions in the program based on certain conditions.

[Programming Concepts](#)

Events

Reacting to user inputs or specific occurrences in the program.

[Programming Concepts](#)

Functions

Creating reusable blocks of code to perform specific tasks.

[Programming Concepts](#)

Data Types

Introducing the idea of different types of data, such as numbers, text, and Boolean values.

[Programming Concepts](#)

Input and Output

Understanding how programs receive information (input) and produce results (output).

[Programming Concepts](#)

Debugging

Identifying and fixing errors or mistakes in the code.

[Programming Concepts](#)

Comments

Adding explanations and notes within the code for better understanding.

[Programming Concepts](#)

Event Handling

Responding to events triggered by user actions or other parts of the program.

[Programming Concepts](#)

Graphics and Animation

Introducing basic concepts of drawing and creating movement in a program.

Programming Concepts

Simulation

Creating virtual scenarios to model real-world situations.

Programming Concepts

Collaboration

Encouraging teamwork and sharing of code with others.

Programming Concepts

Iteration

Repeating a set of instructions or a process.

Programming Concepts
